

## Evolut 4.0 Startup acceleration program

Romanas Zontovičius

Innovation and Entrepreneurship Development Department at Kaunas Science and Technology Park

[Kaunas Science and Technology Park \(Kaunas STP\)](#) is the largest innovation community in Lithuania. Over 110 companies are operating at the tech park. We cover the following industries: IT, Engineering, Health-tech, social innovation, future energy, and Green-tech. Here at Kaunas STP we assist start-ups and established companies on how to increase their transnational competitiveness, and consult them on business development, strategy, and other business-related topics. Park runs a 2-month startup pre-acceleration program called Evolut 4.0 which educates startup and helps to foster an innovation culture in the Kaunas region and Lithuania.

Speaker will provide insights for someone who is thinking of launching a startup acceleration program within their organization. For startups, it will be useful to hear the recommendations on when it is a good idea to participate in the acceleration program and when it's not, and how to pick the best one.
