

# Saules panelīši un motorīņi

Tagad mēs visiem varam izsūtīt tikai šos – 3 gab uz komandu; kopā laukums 99 cm<sup>2</sup> tikai... Vislabāk visus 3 saslēgt virknē...

21. maijā visus modeļus iedalīsim klasēs, arī ar tādu domu, ka klasē ir aptuveni vienāda izmēra saules bateriju laukumi.

### Description

Solar Cell 400mA Solar Batteries encapsulated in polycarbonate case with a honeycomb of lenses on the surface to intensify and focus the power of the light onto the solar crystals below. The output current ranges from 400mA to 1000mA. All of these batteries were able to power the solar motors shown on the previous page when set below a 100W bulb. At the rear of the batteries are metal fixing screws with hexagonal nuts for easy connection. The power output of these batteries may vary.

## Description

This miniature solar motor weighing just 22g and with an outside diameter of just 25mm is just the job to demonstrate the conversion of solar energy and for use in project work. The output shaft has a 2mm diameter making the propellers and impellers a tight push fit onto the spindle. It has an operating range of 0.7 to 5.0 volts at just 200mA. Under a 100W lamp all of the Commotion solar Batteries shown on P36 power this motor. Motor diameter: 23mm.
